

Winter 2024 Provider Newsletter

Aetna Better Health Premier Plan MMAI

You have the power to fight the flu! Vaccinate!

The CDC has proposed the following strategy: mask up, lather up, and sleeve up. We are encouraging our members to: 1) wear a mask in crowded, indoor spaces; 2) wash their hands with soap and water or an alcohol-based sanitizer; and 3) get their annual flu vaccine. The best time to get vaccinated is during September or October, but vaccination after October can still provide protection during the peak of flu season.

For the 2024-2025 flu season, available formulations of quadrivalent vaccine in the United States include several inactivated influenza vaccines (IIVs), one live attenuated influenza vaccine (LAIV), and one recombinant vaccine. Vaccination is recommended for all adults in the absence of contraindications. The choice of formulation depends upon several factors which include age, comorbidities and risk of adverse reactions.

For a full summary of the recommendations from the Advisory Committee on Immunization Practices (ACIP), please refer to the following link: <https://www.cdc.gov/flu/pdf/professionals/acip/acip-2022-23-summary-of-recommendations.pdf>

Preventing Falls with Members

Each year, between 700,000 to a million fall incidents happen within a hospital setting. Up to a 1/3 of these may be preventable. Aetna Assure Premier Plus wants to provide several tools and resources to prevent falls for members, both inside your offices or in the patient's home.

Providers can mitigate fall risks by:

- Including fall risk screenings yearly or following a recent fall
- Evaluating patient's footwear, gait, strength and balance
- Review a patient's medication and home hazard risks
- Educate patients on their risk factors and community resources

For more information for offices, please see the CDC's [Stopping Elderly Accidents, Deaths, & Injuries \(STEADI\) website](#). You can find information on medications linked to falls, materials for member distribution, standardized assessments, and staff training and continuing education.

For information specifically catered to facilities, see the Agency for Healthcare Research and Quality's [Hospital Fall Prevention Program](#) which provides facility-centric training and toolkit to assist facilities mitigate fall risks.

Balance Billing

Providers may not bill members for any Medicare or Medicaid covered services. Members are not responsible for Medicare cost sharing under CMS regulations. Medicare cost sharing includes the deductibles, coinsurance and copays included as part of Medicare Advantage benefit plans.

Dental Benefits

The membership has dental benefits included within their plan. Primary care providers should include discussions of dental health during their wellness visits and remind members to utilize their dental benefits by receiving their semi-annual cleanings and visit with a participating dentist. For more information on their dental plan, please review the provider handbooks for further information.

Availity

What is Availity?

Availity is a single login, multi-payer provider portal with self-service tools and provider-initiated transactions in one convenient location. Once registered, providers can simply add the Aetna instances to their registration at any time.

Aetna and Availity

Availity operates Aetna's provider portal for multiple lines of business, including Commercial, Medicaid, Medicare, and DSNP/MMP products. There are now two instances of Availity for Aetna products: "Aetna" instance is for Medicare/Commercial, and the "Aetna Better Health" instance is for Medicaid/DSNP/MMP. Providers will need add both instances to their Availity profile to access our entire population. Availity will eventually replace the Aetna Better Health Medicaid Web Portal.

Uses of Availity

Availity allows providers to verify member eligibility and benefit coverage, submit claims and subsequent disputes, encounters, submit appeals and grievances, and update their rosters. Learn about the additional functions in one of the training options offered by Availity.

How to receive training?

Did you know that in addition to Availity Client Services, Availity offers a wide range of training sessions for all users via the Availity Essentials Provider Portal? You can simply click on the "Help & Training" dropdown to access both upcoming sessions as well as pre-recorded webinars.

Who can the provider call for assistance?

Call Availity directly at **1-800-AVAILITY (282-4548)**. Monday through Friday from 8 a.m. to 8:00 p.m. ET (excluding holidays). Availity can also be reached through direct

messaging when available. Availity should be contacted for any connectivity or account concerns. Any concerns with an Aetna decision or information on Availity should be directed to the respective provider services.

Quality Program

The Quality Management (QM) Program provides a formal process to objectively and systematically monitor and evaluate the quality, appropriateness, efficiency, safety, and effectiveness of care and service. A multidimensional approach enables the plan to focus on opportunities for improving operational processes as well as health outcomes and satisfaction of members and providers. The QM Program is essential to ensure all medical care and service needs of our members are met and also ensure continuous improvement occurs with the quality of care and services being provided.

The QM Program addresses issues related to quality management and quality performance measures to ensure both state and national compliance. Annually, the health plan evaluates the effectiveness of the QM programs identifying specific opportunities for improvement.

Quality goals:

- Develop and maintain quality improvement processes, structures and resources in support of the organization-wide commitment to provision of quality healthcare for all members
- Development of effective methods to measure outcome of care and services provided to members, as well as interventions to achieve continuous and measurable improvements
- Continuous collaboration with appointed entities to develop and implement structures and programs fostering coordination and continuity of care
- Compliance with applicable federal, state, regulatory, contractual and accreditation requirements (HEDIS, CAHPS, HOS)
- Ensuring adequate accessibility to care and services
- Monitor and ensure members receive seamless, continuous and appropriate attention throughout the continuum of care
- Ensure members have access to appropriate care management programs, including Case Management and Disease Management
- Coordinate, monitor and report QM activities to appropriate committees
- Conduct root cause analysis for benchmarks or goals unmet
- Implement and monitor programs designed to improve the quality and safety of members through member and provider education

In an effort to meet these general goals, the QM Program implements and tracks a variety of QI activities that address the quality and safety of clinical care and quality of service throughout the year. These activities are described within the program evaluation including results compared to performance goals, trending of measures when appropriate,

barrier analysis, opportunities for improvement and interventions.

- Ensure effective credentialing and recredentialing processes for providers who comply with state, federal and accreditation requirements
- Ensure the confidentiality of members is maintained at all times
- Analyze member and provider satisfaction survey results and implement effective interventions to address areas of dissatisfaction
- Oversight of all delegated activities to ensure compliance with all state, federal and accrediting organizations
- Promote improved continuity and coordination of care between medical and behavioral healthcare
- Develop and implement programs based on population analysis and incorporate culturally and linguistically appropriate services

Aetna evaluates the overall effectiveness of the QM Program utilizing the aforementioned findings to determine the adequacy of QM Program resources, QM committee structure, practitioner participation and leadership involvement. Where needed, changes to the QM Program for the subsequent year are made.

If you would like more information on our QM Program, please call Member Services or our Provider Network. It is very important to us that all members get access to the highest quality care and services possible. We want providers to know that not only do we listen to their feedback but try to find a way to implement that feedback.

Retrospective Review Primer

A retrospective review is when the service has started. If the Date of service is before the request comes in then it is considered a Retrospective case. For example, the service started on 3/20 and your request is received by the plan on 3/22 that would be a retrospective review. Post Service requests are not processed as Expedited or Urgent requests.

A retrospective review cannot be performed in the following instances:

- A claim for the service/treatment has been submitted to the health plan
- The retrospective review request is made more than 180 days beyond the actual date of the service/treatment

Decisions will be made and you will be notified within thirty (30) calendar days of receipt of the request.

Alternative Formats and Languages

If you wish to make or change a standing request to receive all materials in a language other than English or in an alternate format, you can call Aetna Better Health Premier Plan MMAI Member Services at **1-866-600-2139 (TTY: 711)**, 24 hours a day, 7 days a week.

MOOP & Cost-Share Claims

This document is to provide a summary of two regulatory changes that impact Medicare medical providers. Both of these changes take effect on January 1, 2023.

Maximum Out Of Pocket (MOOP)

The MOOP limit for dual members will now be tracked based on the accrual of all Medicare Part A & B cost sharing in the plan, whether those cost sharing amounts are paid by the member, other secondary insurance, or not paid at all. As a reminder, once MOOP is met Aetna will pay 100% of Medicare A&B covered services for the remainder of the calendar year.

Prior to 2023, MOOP for dual members was tracked by calculating cost share amounts paid by the member. CMS projects this change will increase payment to providers serving DSNP and MMP members by \$8 billion over 10 years.

Regulatory Citation: 42 CFR § 422.100 and 422.101

Medicaid Enrollment for Cost-Share Claims

State Medicaid programs must accept enrollment of all Medicare-enrolled providers and suppliers if the provider or supplier otherwise meets all Federal Medicaid enrollment requirements. Even if a provider or supplier is of a type not recognized as eligible to enroll in the State Medicaid program or is located out of state.

This change means, the provider does not have to become part of the Medicaid provider network or see Medicaid patients. If the provider or supplier chooses not to enroll with Medicaid, the state is not required to process their cost-share claims. In other words, the payment from Aetna would be payment in full.

Regulatory Citation: 42 CFR § 455.410(d)

Updating Rosters and Provider Details

One of the functions available within Availity is updating provider demographics and roster information. Due to Availity serving multiple payers, providers can update their profiles on the Provider Data Management (PDM) page and have quarterly updates sent to all participating payers. In the page you can update service locations, location ADA compliance, update contact information, modify NPIs for

the business, provide hospital affiliations, and correct provider profiles. You can reach the PDM by clicking on “My Providers” on the main page.

Reminder: Submitting Expedited (Urgent) Authorization Requests

Aetna's goal is to always provide a prompt response to the requests submitted and we need your help. As a reminder, an expedited request indicates that applying the standard time frame for making determinations could seriously jeopardize the life or health of the member or the member's ability to regain maximum function.

Submission of all necessary information helps get our members what they need, while in your care. Please see the provider portal for the necessary Prior Auth forms. It is vital that all lines are filled out in their entirety, including CPT codes, diagnosis codes, and your National Provider Identification (NPI). If not, the case could pend for lack of clinical information. The primary reason for denials is lack of clinical information received. Please ensure that you are prepared with appropriate clinical during your submission. Please reach out if you are not sure what needs sent or watch for a fax back from us telling you what will help process your case.

Provider portal

Our enhanced, secure and user-friendly web portal is available at

<https://www.aetnabetterhealth.com/illinois/providers/portal>. This HIPAA-compliant portal is available 24 hours a day. It supports the functions and access to information that you need to take care of your patients. Popular features include:

Single sign-on. One login and password allow you to move smoothly through various systems.

Personalized content and services. After login, you will find a landing page customized to you.

Real-time data access. View updates as soon as they are posted.

Better tracking. Know immediately the status of each claim submission and medical prior authorization request.

eReferrals. Go paperless. Refer patients to registered specialists electronically and communicate securely with the provider.

AutoAuths. Depending on the auth type and service location, it is possible to receive an auto-approval on your request.

Detailed summaries. Find easy access to details about denied prior authorization requests or claims.

Enhanced information. Analyze, track, and improve services and processes.

Provider notices/communications. Review the provider manual and other documents related to members' benefits.

To access the provider portal, please go to

<https://www.aetnabetterhealth.com/illinois/providers/portal>. For more information, contact Provider Services at **1-855-364-0974**.

Population Health Management

Aetna Medicare-Medicaid Plans maintains Population Health Management (PHM) programs and activities selected to meet the needs of the member population and target their individual risks. These programs are designed to support delivery of care. Each PHM program includes measurable goals that are used to determine program effectiveness.

Aetna continues to work collaboratively with provider networks to ensure that the recommended screenings and services are completed for the served membership. Below are some of the programs we offer to members:

Keeping Members Healthy

Programs are targeted to align with low risk populations. With an emphasis on preventive healthcare and closing gaps in care, members are encouraged to get the screenings that are needed to stay healthy. The PHM program for members is a Flu Vaccination Program that includes educational activities to promote annual flu vaccination.

Managing Members with Emerging Risk

Programs are targeted to align with medium risk populations. Engagement with practitioners focuses on supporting Patient Care Medical Home models to centralize care and patient-driven decision-making. The PHM program for members is a Hepatitis C Program that supports members in completing a prescribed treatment regimen.

Patient Safety and Outcomes Across Settings

Programs are targeted to align with members that experience health services across settings. Engagement with practitioners focuses on communication and collaboration with their patients to share information to prevent duplication and potential for harm. The PHM program for members is Appropriate Use of Acute Care Settings that includes early notification through in-patient alerts.

Managing Multiple Chronic Conditions

Programs are targeted to align with high and intensive risk populations. Engagement with practitioners focuses on maintaining engagement outside of clinic and office visits. The PHM program for members is Life Planning/Advance Directives/Palliative Care that includes providing life planning/advance directive information to members upon enrollment.

Cognitive Impairment Program

This program is targeted towards members and/or their caregivers who are either formally diagnosed with mild to severe cognitive impairments or are identified with positive findings for cognitive impairment. The focus is on member safety (medication, home safety, driving, financial, wandering), supporting a least restrictive residential setting, and working towards an optimal quality of life for the member and the caregiver. Aetna care managers will work with members and providers to ensure that members receive the right care and services that meet members' needs.

Continuous Glucose Monitoring (CGM)

Aetna Better Health Premier Plan MMAI is working to reduce the long-term sequelae of diabetes. In addition, to working with our diabetic members chronic condition management including to have their hemoglobin A1c checked at least once a year, the plan is encouraging our providers to consider continuous glucose monitoring (CGM) systems for their patients with diabetes that would benefit from this. In general, individuals with diabetes are most appropriate for CGM when they:

- require at least 3 insulin administrations per day or use an insulin pump; and
- require frequent adjustment of insulin regimen based on their blood glucose levels.

In addition, individuals who suffer from frequent episodes of hypoglycemia may also be appropriate candidates. CGM allows you and your patients to see the fluctuations in blood glucose levels throughout the day, providing a more real-time view of their glycemic control. **CGMs do not require prior authorization.** For additional information, please refer to the following:

<https://diabetes.org/tools-support/devices-technology>

Updating Rates for Critical Access Hospital

Aetna Better Health Premier Plan MMAI always strives to provide prompt and accurate payment. Aetna is asking for Critical Access Hospitals to forward any updated rate and fee schedule documentation to Aetna as soon as they receive them.

This will allow Aetna to update claim rates as soon as possible. Completing rate adjustments in a timely fashion helps avoid claim readjudication or recoupment. Your assistance is greatly appreciated.

EFT/ERA Registration

Aetna Better Health Premier Plan MMAI partnering with ECHO Health, Inc. to introduce the new EFT/ERA Registration Services (EERS), a better and more streamlined way for our providers to access payment services.

What is EERS?

EERS will offer providers a standardized method of electronic payment and remittance while also expediting the payee enrollment and verification process. Providers will be able to use EERS will offer providers a standardized method of electronic payment and remittance while also expediting the payee enrollment and verification process. Providers will be able to use the ECHO Health, Inc. tool to manage ETF and ERA enrollments with multiple payers on a single platform.

How does it work?

Please complete the ERA/EFT **enrollment form**. Upon submission, paperwork outlining the terms and conditions will be emailed to you directly along with additional instructions for

setup. ECHO Health, Inc. supports both NPI and TIN level enrollment. You will be prompted to select the option that you would like to use during the enrollment process. If you need assistance, contact ECHO Health, Inc. at allpayer@echohealthinc.com or 888.834.3511.

How and when do I enroll?

All Aetna Better Health plans will migrate payee enrollment and verification to EERS. To enroll in EERS, please visit ECHO Health, Inc. [Portal Guide](#).

Complex Care Management Referral Options

Empowerment through care management

Aetna Medicare Medicaid Plans offer an evidence-based care management program to help our members improve their health and access the services they need. Care managers typically are nurses or social workers. These professionals create comprehensive care plans that help members meet specific health goals.

All members are assigned their own care manager. The amount of care management a member receives is based upon an individual member's needs. Some of the reasons you may want to ask the health plan to have a care manager contact the member are:

- Does the member frequently use the emergency room instead of visiting your office for ongoing issues?
- Has the member recently had multiple hospitalizations?
- Is the member having difficulty obtaining medical benefits ordered by providers?
- Has the member been diagnosed with Congestive Heart Failure (CHF) diabetes, asthma, or Chronic Obstructive Pulmonary Disorder (COPD), hypertension, or End Stage Renal Disease (ESRD), yet does not comply with the recommended treatment regimen and would benefit from telemonitoring of these conditions?
- Does the member need help to apply for a state-based long-term care program?
- Does the member live with HIV?
- Is the member pregnant with high-risk conditions?
- Is the member pregnant and over 35 years of age?
- Has the member received a referral to a specialist, but is unsure of the next steps?
- Does the member need information on available community services and resources (e.g. energy assistance, housing assistance)?

What happens to your referral?

After you make a referral, the member's care manager contacts the member. The care manager might also contact the member's caregivers or others as needed.

What will a care manager do?

To help the member learn how to manage their illness and meet their health and other needs, a care manager contacts the member to schedule a time to complete an assessment. The care manager asks the member questions about his or her health and the resources currently being used. Answers to these questions help the

care manager determine what kind of assistance the member needs most.

What will a care manager do?

Next, the member and the care manager work together to develop a care plan. The care manager also educates the member on how to obtain what they need. The care manager also may work with the member's health care providers to coordinate these needs. The amount of care management and frequency of contact with the member and others will vary based upon the individual needs of the member.

To make referrals for care management consideration, please call Provider Services at **1-866-600-2139**. A care manager will review and respond to your request within 3-5 business days.

Pharmacy Benefits

Aetna Better Health Premier Plan MMAI's List of Covered Drugs ("the Drug List" or the formulary) is a comprehensive list of covered prescription drugs, over-the-counter drugs, and items at participating network pharmacies. The Drug List and network pharmacies are posted on the plan's website at:

www.aetnabetterhealth.com/illinois.

The Drug List is updated monthly throughout the year, and the date of last change is noted on the front cover of the Drug List. Changes to the plan's Drug List is also posted on the plan's website

Visit our website at aetnabetterhealth.com/Illinois for the updated Drug List. For a printed copy of anything on our website, call Member Services toll-free at **1-866-600-2139**.

The Drug List has detailed information about prior authorization, quantity limitation, step therapy, or formulary exceptions under "Necessary actions, restrictions, or limits on use." To request prior authorization or formulary exception reviews, call Member Services toll-free at **1-866-600-2139**. A Member Services representative will work with you to submit a request for prior authorization or formulary exception.

Types of rules or limits:

- Prior approval (or prior authorization)
- Quantity limits
- Step therapy
- If a medication is not on the Drug List (called Formulary Exception)

Aetna Better Health Premier Plan MMAI does not charge member copays for covered prescription and OTC drugs as long as Aetna Better Health Premier Plan MMAI's rules are followed and drugs are filled at a network pharmacy.

Covered drugs are designated the following coverage tiers.

- Tier 1 drugs are Medicare Part D prescription brand name and generic drugs.
- Tier 2 drugs are Medicare Part D prescription brand name and generic drugs.
- Tier 3 drugs are Non-Medicare Part D prescription and over-the-counter drugs.

Electronic Submission of Pharmacy Prior Authorizations

We are committed to making sure our providers receive the best possible information, and the latest technology and tools available. We have partnered with CoverMyMeds® and SureScripts to provide you a new way to request a pharmacy prior authorization through the implementation of Electronic Prior Authorization (ePA) program. With Electronic Prior Authorization (ePA), you can look forward to:

- Time saving: Decreasing paperwork, phone calls and faxes for requests for prior authorization
- Quicker Determinations: Reduces average wait times, resolution often within minutes
- Accommodating & Secure:
- HIPAA compliant via electronically submitted requests.
- Getting started is easy. Choose ways to enroll:
- Visit the [CoverMyMeds® website](#)
- Call CoverMyMeds® toll-free at **866-452-5017**
- Visit the [SureScripts website](#)
- Call SureScripts toll-free at **866-797-3239**

No cost required! Let us help get you started!

Members' Rights and Responsibilities

As a practitioner who ensures high quality care for Aetna Better Health Premier Plan MMAI members, you should be aware of the members' rights and responsibilities. Some of the rights members are afforded are as follows:

- A right to receive information about Aetna, our services, our practitioners and providers, and member rights and responsibilities
- A right to be treated with respect and recognition of the member's dignity and right to privacy
- A right to participate with practitioners in making decisions about their health care
- A right to a candid discussion of appropriate or medically necessary treatment options for a member's condition, regardless of cost or benefit coverage
- A right to voice complaints or appeals about Aetna or the care we provide
- A right to make recommendations regarding Aetna's member rights and

responsibilities policy

In addition, our members have the following responsibilities:

- A responsibility to supply information, to the extent possible, that Aetna and our practitioners and providers need in order to provide care
- A responsibility to follow plans and instructions for care that they have agreed to with their practitioners
- A responsibility to understand their health problems and participate in developing mutually agreed-upon treatment goals, to the degree possible

For a complete list of member rights and responsibilities visit our at:

<https://www.aetnabetterhealth.com/Illinois> to see our Member Handbook.

Advance Directives Having the Conversation with Your Patient

A patient's comfort in contemplating, completing or even discussing an advance directive can greatly depend on what the physician has to say and offer.

Your contract requires documentation in the patient's medical record of whether the individual has completed an advance directive.

Medical record Having a conversation around advance directives with patients can be an awkward conversation in large part because many patients only see the advance directive process in terms of suffering and death. As the healthcare provider, you should approach advance care planning from the perspective of living well and quality of life. Approaching the subject in this way would allow members to engage in discussing what matters most to them so their wishes will be honored. You may start the conversation by asking about the types of treatments to consider if the member becomes very ill, is unable to recognize family, is unable to perform self-care or is unlikely to get better.

Advance directives are considered legal documents that take effect when someone is no longer able to speak for himself or herself. They ensure that your medical preferences are properly carried out by your health care provider. Advance directives include a living will and durable power of attorney for healthcare (DPA).

You should know that the AMA has developed training materials and ethical guidelines that provide understanding as to what patients want and physicians are able to provide. You can find those guidelines at ama-assn.org.

Additionally, Medicare offers payment for a voluntary advance-care planning (ACP) consultation offered by the physician or other qualified health professional when done face-to-face with the patient, family member(s) and/or surrogate.

For additional information on the medical records audit components refer to your provider manual

Cultural Competency Training

Providers and their office staff are responsible for ensuring all services, both clinical and non-clinical, are provided in a culturally competent manner and are accessible to all patients. This includes those with limited English proficiency, limited reading skills, hearing incapacity, or those with diverse cultural and ethnic backgrounds.

Providers should ensure to address and document that patients are effectively receiving understandable, respectful, and timely care compatible with their cultural health beliefs, practices, and preferred languages from all staff members. Providers should also honor members' beliefs, be sensitive to cultural diversity, and foster respect for members' cultural backgrounds.

Aetna conducts initial cultural competency training during Provider orientation meetings. If you have not previously completed Cultural Competency training or annual retraining, please take a moment to watch the video below:

How Effective Healthcare Communication Contributes to Health Equity and visit: thinkculturalhealth.hhs.gov/

Additionally, Aetna's Quality Interactions® course series is available to Provider who wish to learn more about cultural competency. This course is designed to help you:

- Bridge cultures
- Build stronger patient relationships
- Provide more effective care to ethnic and minority patients
- Work with your patients to help obtain better health outcomes

To access the online cultural competency course, please visit:

hrsa.gov/culturalcompetence

Clinical Criteria for Utilization Management Decisions

How to request criteria

Aetna Better Health Premier Plan MMAI medical necessity decisions for requested medical and behavioral services are based upon CMS National Coverage and Local Coverage Determinations, and nationally recognized evidence-based criteria, which are applied based on the needs of individual members and characteristics of the local delivery system. Aetna uses the following medical review criteria for physical and behavioral health medical necessity decisions which are consulted in the following order:

1. National Coverage Determination (NCD) or other Medicare guidance (e.g., Medicare Policy Benefit Manual, Medicare Managed Care Manual, Medicare Claims Processing Manual, Medicare Learning Network (MLN) Matters Articles)
2. Medicare Coverage Database ([link](#))
3. Local Coverage Determination (LCD) and Local Policy Articles (A/B MAC & DME MAC) ([link](#))
4. Aetna Clinical Policy Bulletins (CPB) available on Aetna.com ([link](#))
5. Medical Coverage Guidelines (MCG): For inpatient stays, Aetna Medicare uses MCGs as a resource for determining medical necessity for inpatient hospital and long-term acute care hospital (LTACH) stays in conjunction with Medicare Benefit Policy Manual Chapter 1 - Inpatient Hospital Services Covered Under Part A. Medicare guidelines are very general so MCGs provide condition specific guidance ([link](#))

6. Pharmacy clinical guidelines
7. Aetna Medicaid Pharmacy Guidelines

To request criteria, call Provider Experience at **1-866-600-2139** or visit our website at <https://www.aetnabetterhealth.com/illinois/providers/>

Affirmative Statement

Making sure members get the right care

Our Utilization Management (UM) program ensures members receive the right care in the right setting when they need it. UM staff can help you and our members make decisions about their health care. When we make decisions, it is important to remember the following:

- We make UM decisions by looking at members’ benefits and choosing the most appropriate care and service. Members also must have active coverage.
- We don’t reward providers or other people for denying coverage or care.
- Our employees do not get any incentives to reduce the services members receive.

You can get more information about UM by calling us at **1-866-600-2139**, 24 hours a day, 7 days a week. Language translation for members is provided for free by calling **1-866-600-2139**. Practitioners may freely communicate with patients about all treatment options, regardless of benefit coverage limitations.

Appointment Availability Standards & Timeframes

Providers are required to schedule appointments for eligible enrollees in accordance with the minimum appointment availability standards and based on the acuity and severity of the presenting condition, in conjunction with the enrollee's past and current medical history. Our Provider Services Department will routinely monitor compliance and seek Corrective Action Plans (CAP), such as panel or referral restrictions, from providers that do not meet accessibility standards. Providers are contractually required to meet the National Committee for Quality Assurance (NCQA) standards for timely access to care and services, considering the urgency of and the need for the services.

The table below indicates appointment wait time standards for Primary Care Providers (PCPs), Obstetrics and Gynecologist (OB/GYNs), high volume Participating Specialist Providers (PSPs), and Mental Health Clinics and Mental Health/Substance Abuse (MH/SA) providers.

Provider	Emergency	Urgent	Routine	Wait Time in the Office
Primary Care	Immediate	24 Hours	28 Days	No more than 45 minutes, except when the provider is unavailable due to an

				emergency
Specialist	Immediate	24 Hours	28 Days	No more than 45 minutes, except when the provider is unavailable due to an emergency
OB/GYN	Immediate	24 Hours	1 st Trimester: 3 Weeks 2 nd Trimester: 7 Days 3 rd Trimester: 3 Days High Risk: 3 Days Routine: 3 Weeks Postpartum: 6 weeks	No more than 45 minutes, except when the provider is unavailable due to an emergency
Behavioral Health	Immediate	24 Hours	10 Days	No more than 45 minutes, except when the provider is unavailable due to an emergency

In addition to the standards above, Behavioral Health providers are required to offer:

- Follow-up Behavioral Health Medical Management within 3 months of the first appointment
- Follow-up Behavioral Health Therapy within 10 business days of the first appointment
- Next Follow-up Behavioral Health Therapy within 30 business days of the first appointment

Reminder: All providers must re-validate their enrollment in IMPACT.

The Centers for Medicare & Medicaid Services (CMS) requires state Medicaid programs to re-validate all actively enrolled providers at least every five years. As a result of the COVID-19 Public Health Emergency, re-validations that were due in year 2020 were postponed.

The Illinois Department of Healthcare and Family Services (HFS) has asked us to let providers enrolled in Medicaid know that they must complete a revalidation to remain active in the program.

Starting in September 2024, all providers will be required to re-validate based on their enrollment date. All providers must complete the IMPACT revalidation process to remain enrolled in Medicaid. This includes providers who participate in the MMAI (Medicare-Medicaid) Plan.

Important reminders:

- Revalidation notices will be sent in stages and regular every five-year revalidation will be ongoing moving forward. Providers are encouraged to watch their email inbox for revalidation instructions from HFS. **Currently enrolled Medicaid providers will receive two email notifications: 90 days and 30 days prior to their Revalidation Due Date.**
- **Failure to re-validate will result in the provider being deactivated from Medicaid. When deactivated (removed), providers will no longer be able to bill and get paid for services provided to Medicaid or MMAI members.**
- Authorized staff may complete the revalidation on behalf of a provider. Instructions for individuals and organizations are available at [HFS.Illinois.gov/Impact](https://www.hfs.illinois.gov/Impact).

Need more information?

More information about revalidation, including a list of **Frequently Asked Questions** is available from HFS at [HFS.Illinois.gov/Impact](https://www.hfs.illinois.gov/Impact) or you may call them at **1-877-782-5565**

Performance Improvement Projects

Aetna conducts Performance Improvement Projects (PIPs), Chronic Condition Improvement Program (CCIPs) and Quality Improvement Projects (QIPs) in accordance with state and CMS requirements. The goal is to design projects to improve performance in the quality or appropriateness of service provision. PIP, CCIP and QIP topics are identified either from areas of importance or weakness identified by regulators or by the health plan. Examination of relevant clinical, survey, financial, demographic, and/or encounter data that relate to quality of care, utilization of services, or other factors that impact membership, providers, or the larger community precede design and implementation of PIP, CCIP and QIP activities. When not specified by a regulator, selection of PIP, CCIP and QIP activities should consider the prevalence of conditions among members, the need for specific services, identified barriers to service, demographic characteristics, identified ethnic/racial disparities, and emerging health risks among members or the community served by Aetna. The chief medical officer and/or QMOC review and approve PIP, CCIP and QIP proposals.

The goal of each PIP, CCIP and QIP selected by Aetna is to achieve sustained improvement over time. Each PIP, CCIP and QIP includes performance goals that are specific, measurable, attainable, relevant, and timely. Each PIP, CCIP and QIP follows QAPI program methodology.

PIP, CCIP and QIP topics with related monitoring activities, reflect the needs or issues of Aetna's population including age, disease categories and special risk status. Indicators associated with studies and monitoring activities are objective, measurable, and based on national benchmarks or historical data.

What's CAHPS?

CAHPS is a survey that the National Committee for Quality Assurance (NCQA) developed to measure patient satisfaction with their health care. It provides patient perspective of the care they received and includes information about their access to medical services, physicians, specialists, and behavioral health providers. The survey also asks about communication with their doctor.

We participate in these surveys annually for our adult and child members, and the results help us identify strengths and opportunities for improvement. The survey focuses on these areas of care:

- Understanding and respect from providers
- Tobacco cessation discussions
- Flu prevention
- Coordination of care

How do you impact CAHPS?

- Understanding the value of the survey
- Engage and listen to patients during their visits
- Enhance perception about thoroughness and appropriateness of care by explaining why tests may be needed and using easy to understand words.
- Ask for their input about their care or treatment plan

HEDIS® Data Collection to Begin

It's time again to collect data for the Healthcare Effectiveness Data and Information Set (HEDIS®). Each year we collect medical record data on a sample of our members in your care as part of the nationwide collaborative effort among employers, health plans and physicians. HEDIS is one of the most widely used sets of health care performance measures in the United States. The goal is to monitor and compare health plan performance on specific performance measures. We will be contacting you soon to request these medical records. Your participation and timely response to our medical record request is key to the success of the project.

We understand your concerns about confidentiality and releasing medical records. Be assured that our data collection efforts comply with Health Insurance Portability and Accountability Act (HIPAA) regulations. All of the information is kept confidential. We only use the data in an aggregate form and do not release patient-specific information. Our members are made aware of our quality programs and how we manage confidentiality and privacy through their member handbook. We do not require a member's signature to release this information as the health care operations exception under HIPAA allows this activity.

Minimum Documentation Requirements

All records must include:

- 1) The patient's name on every page of documentation.
- 2) The patient's date of birth on at least one page of documentation.
- 3) The information requested for each measure (which will be included with the member list that will be faxed to you at the beginning of the project).

HEDIS® Provider/Facility Frequently Asked Questions

1. What is HEDIS?

The Healthcare Effectiveness Data and Information Set (HEDIS) is one of the most widely used sets of health care performance measures in the United States. It is developed and maintained by the National Committee for Quality Assurance (NCQA). The HEDIS methodology provides a systematic and standardized way for health plans to document how well they provide health care services to enrolled members.

Health plans have the option of calculating HEDIS rates by using the administrative data methodology or the hybrid methodology. The administrative data methodology is limited to the use of claim and encounter data submitted to the health plan. The hybrid methodology includes claim and encounter data, but also uses data obtained directly from the member's medical record. This allows the health plan to count services where claim or encounter data were not received.

Use of medical record data requires that we obtain a copy of the member's medical record. Each record should include the member name, gender and date of birth to confirm that the correct record has been obtained. The copy should be limited to required documentation and demographic information.

2. What is needed from your practice/office/facility?

A response to Aetna's requests for medical record documentation in a timely manner.

3. When will the Aetna need the records?

HEDIS data collection is a time sensitive project. Medical records should be made available on the date of the onsite review, or by the date requested, in the case of upload/fax/mail. Typically, data collection begins in mid-February and ends in late April.

It is imperative that you respond to a request for medical records within five (5) business days to ensure we are able to report complete and accurate rates to state and federal regulatory bodies, as well as NCQA.

4. Do HIPAA Rules apply?

Yes, all of our nurses will be trained by the health plan on HIPAA, Confidentiality and handling Personal Health Information (PHI) prior to going to provider offices.

5. Does HIPAA permit me to release records to Aetna for HEDIS Data Collection?

Yes. You are permitted to disclose PHI to Aetna. A signed consent from the member is not required under the HIPAA privacy rule for you to release the requested information to Aetna.

6. Who will be reviewing medical records?

Aetna contracts with HEDIS reviewers to perform the medical record abstraction for the HEDIS project. The HEDIS reviewers go through a thorough training on HEDIS medical record abstraction and everything it entails including HIPAA and PHI.

7. Is my participation in HEDIS data collection mandatory?

Yes. Network participants are contractually required to provide medical record information so that we may fulfill our state and federal regulatory and accreditation obligations.

8. How am I (provider) measured?

HEDIS is NOT a measurement of individual providers, nor how they keep their medical records. It's a measurement of how the health plan is performing to get their members needed services such as immunizations or well child visits. No reports will be given on a specific provider. Aggregated results of the health plan will be shared with CMS and NCQA.

9. Am I required to provide medical records for a member who was seen by a physician who has retired, died, or moved?

Yes. HEDIS data collection includes reviewing medical records as far back as 10 years. Archived medical records/data are required to complete data collection.

10. Will I be reimbursed for copies/materials?

Per the standard contract as a participating provider with Aetna, we do not reimburse for medical record copies requested for HEDIS data collection. If you have additional questions, please consult your participation agreement or talk to your Aetna network representative.

For more information on HEDIS, you can visit NCQA's [website](#).
