	TTER HEALTH® Policy/Guideline		⇔ aetna [™]		
Name:	Yorvipath		Page:		1 of 2
Effective Date: 11/13/2024			Last Review Date:		9/30/2024
Applies to:	⊠Illinois ⊠Florida Kids	⊠New Jersey ⊠Pennsylvania Kids	⊠Maryland ⊠Virginia	⊠Kentuc	ky PRMD

Intent:

The intent of this policy/guideline is to provide information to the prescribing practitioner outlining the coverage criteria for Yorvipath under the patient's prescription drug benefit.

Description:

FDA-Approved Indication

Yorvipath is indicated for the treatment of hypoparathyroidism in adults.

Limitations of Use:

- Yorvipath was not studied for acute post-surgical hypoparathyroidism
- Yorvipath's titration scheme was only evaluated in adults who first achieved an albumin-corrected serum calcium of at least 7.8 mg/dL using calcium and active vitamin D treatment

All other indications are considered experimental/investigational and not medically necessary.

Applicable Drug List:

Yorvipath

Policy/Guideline:

Documentation

Submission of the following information is necessary to initiate the prior authorization review:

- A. Initial requests:
 - 1. Chart notes, medical record documentation, or claims history supporting current use of vitamin D metabolite/analog therapy and elemental calcium
 - 2. Lab results confirming serum 25-hydroxyvitamin D concentration is above the lower limit of normal laboratory range
 - 3. Lab results confirming albumin-corrected serum calcium is greater than or equal to 7.8 mg/dL prior to initiating therapy with the requested medication
 - 4. Lab results confirming serum magnesium level is within normal laboratory limits
- B. Continuation requests:
 - Lab results confirming maintenance or normalization of calcium levels compared to baseline

Criteria for Initial Approval:

Hypoparathyroidism

Authorization of 12 months may be granted for treatment of hypoparathyroidism in adult members when ALL the following criteria are met:

AETNA BETTER HEALTH® ◆aetna							
Coverage	Policy/Guideline						
Name:	Yorvipath		Page:		2 of 2		
Effective Date: 11/13/2024			Last Review Date:		9/30/2024		
Applies	⊠Illinois	⊠New Jersey	⊠Maryland	⊠Kentucky PRMD			
to:	⊠Florida Kids	⊠Pennsylvania Kids	⊠Virginia				

- A. Member has hypoparathyroidism for six months or more.
- B. Member is receiving vitamin D metabolite/analog therapy with calcitriol greater than or equal to 0.5 mcg per day or alfacalcidol greater than or equal to 1.0 mcg per day.
- C. Member is receiving elemental calcium treatment greater than or equal to 800 mg per day.
- D. Serum 25-hydroxyvitamin D concentration is above the lower limit of normal laboratory range.
- E. Albumin-corrected serum calcium level is greater than or equal to 7.8 mg/dL prior to initiating therapy with the requested medication.

 Serum magnesium level is within normal laboratory limits.
- F. Coverage will NOT be provided for members with the following exclusion:
 - 1. Acute postsurgical hypoparathyroidism (within 6 months of surgery) and expected recovery from hypoparathyroidism.

Criteria for Continuation of Therapy

Authorization of 12 months may be granted for continued treatment in adult members requesting reauthorization for Hypoparathyroidism and who are experiencing benefit from therapy as evidenced by maintenance or normalization of calcium levels compared to baseline

Approval Duration and Quantity Restrictions:

Approval Duration: 12 months

Quantity Level Limit: Reference Formulary for drug specific quantity level limits
